

Project Design Phase-I

Proposed Solution Template

Date	19 Dec 2025
Team ID	LTVIP2026TMIDS35041
Project Name	Measuring The Pulse Of Prosperity: An Index Of Economic Freedom Analysis
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Global economic data related to economic freedom is large, complex, and difficult to interpret using traditional tables and reports. There is a lack of interactive and visual tools to compare countries and regions effectively for informed decision-making.
2.	Idea / Solution description	The proposed solution is to develop an interactive data analytics system using Tableau that visualizes Economic Freedom data for 2022. The solution includes dashboards and stories that present country-wise and region-wise economic freedom scores, GDP growth, inflation, unemployment, and financial freedom indicators for easy comparison and analysis.
3.	Novelty / Uniqueness	The solution uniquely combines multiple economic indicators into a single interactive Tableau platform with maps, dashboards, and storytelling. Users can dynamically explore global economic freedom trends instead of relying on static reports.
4.	Social Impact / Customer Satisfaction	This solution helps policymakers, researchers, students, and analysts gain better insights into economic conditions across countries. It improves transparency, understanding, and awareness of global economic freedom, leading to better policy formulation and academic learning.
5.	Business Model (Revenue Model)	The solution can be offered as a subscription-based analytics service for organizations, educational institutions, and research firms. It can also be used as a free public dashboard with premium features such as advanced analytics and customized reports.
6.	Scalability of the Solution	The solution is highly scalable as new datasets, additional years, and more economic indicators can be easily integrated. It can be expanded to include real-time data updates and extended to regional or country-specific economic analysis platforms.
